

# January night works

## Punt Road overpass expansion joint replacement works

**As part of keeping CityLink in good condition for motorists, we undertake a regular program of maintenance activities. We're letting you know about some works that may impact you early next year as we upgrade the bridge on CityLink where it crosses Punt Road.**

This work will involve replacing expansion joints, which sit between the concrete on the bridge deck and enable it to safely 'flex' when needed.

We will need to remove the existing expansion joints by using a process called hydro-demolition, which uses a high-pressure water spray to break away concrete faster and without damaging steel structures that may lie underneath. Unfortunately, this work is expected to be noisy.

We have put in place a number of measures to help manage the noise including using a 'sound curtain' to help minimise noise and we will be using mufflers and equipment that produces lower noise where possible in line with EPA guidelines. We have broken up the work schedule to reduce the number of consecutive nights of disruption and we will be monitoring noise throughout the works.

For our team to complete the works safely, it requires a number of lanes on CityLink / Monash Freeway to be closed, which can only be done at night when traffic volumes are typically lower.

### What do I need to know?

Hydro-demolition works will commence between 9pm – 5am in January on the dates below:

- **Monday 11 January to Thursday 14 January**
- **Sunday 17 January to Thursday 21 January**
- **Tuesday 26 January – Thursday 28 January**
- **Sunday 31 January**

### What to expect during these works:

- Noise at night from removal of concrete and asphalt surrounding the expansion joints using a high-pressure water cutting robot (hydro-demolition)
- Use of machinery including drills, hammers, water pumps and generators
- Additional lighting on and under the freeway
- Closure of the Cremorne underpass car park
- Work vehicles on and under CityLink in the work zone

## Work zones

If you have any questions about these night works **please contact us on 1300 381 570.**

*Thank you for your patience while we carry out these critical works.*
